For more information: http://www.swisscom.ch/office365
Swisscom generates a monthly invoice for the reoccurring services. There is no minimum contract term.

Activation assistance is provided by Swisscom or a highly qualified Swisscom partner on behalf of Swisscom. The experienced companion ensures the rapid and successful initial deployment of at least three online services and ten Office programs. A successful completion of the activation with the qualified partner is required for the subsequent support of Troubleshooting.

This deployment assistance from Office 365 includes: Order of Office 365 admin account and user licenses, incorporating an existing domain (web address), setting up a first user on a computer (download of Office Professional Plus, connection with Exchange Online, SharePoint Online and Lync Online) and a mobile phone (connection with Exchange Online). Documentation of the access details to online services. Explanation of the next administration and setup steps of how more users can be added. The help is on the phone with remote access to your computer. Fast Internet connection is required. If necessary, contact the partner for specific instructions for further needs.

Additional Services if required (not included in the activation charge):
The following services are not included in the activation package and will be provided by designated Swisscom Partners. The Service Provider will generate the invoice directly.

Consultation and offer of additional services	for free
Data transfer from other systems	charged at cost
Composition of a public website and a teamsite on SharePoint Online	charged at cost
Introduction to usage, with advice and tricks	charged at cost
