## The advantages of SMS desktop

---

### **Program delivery times:**

Delivery date and time can be selected to suit.

### **Group messaging:**

Send messages to up to 100 people at the same time.

### **Long messaging:**

Send messages of up to 730 characters.

### **Appointment reminder:**

You are automatically reminded about appointments stored in the Outlook calendar by text.

### **Delivery confirmation by e-mail:**

Find out when the text is delivered.

**You can choose to receive a reply** either on your computer or NATEL®.

## The advantages for you

---

You will never forget a birthday again! You can send birthday wishes days in advance by text. But the text will not be delivered before the desired date.

One simple step for communicating with a large number of contacts - by sending a text to several contacts or whole groups. Like when sending e-mails, recipients can easily be added from the Outlook address book.

Never have to stop at 160 characters again! With SMS Desktop you can (nearly) write as much as you want.

You will never forget an appointment again! You will be informed in advance by text about upcoming appointments stored in your Outlook calendar.

You will never again wonder if your text has reached the recipient! With delivery confirmation, you find out instantly if your text has been delivered to the recipient.

You choose yourself if you want your reply to be in text format on your NATEL® or as an e-mail in Outlook.
