

Set up automatic hotspot login

Set up your iPhone for automatic login at Swisscom hotspots in 3 easy steps.

<p>Step 1: Go to Settings and press “Wi-Fi”.</p>	<p>Step 2: First activate the WLAN connection by sliding the Wi-Fi switch to the right. An automatic search for available networks will then be carried out. Then click on the blue button for the “MOBILE-EAPSIM” network.</p>	<p>Step 3: Now slide the “Automatic connection” switch to the right. If you have activated automatic connection once already then your settings will remain saved and you will be automatically connected to an available hotspot provided you have activated WLAN.</p>
