

Ethernet Private Line Services

Efficient and affordable high-speed connection between two sites

Your benefits

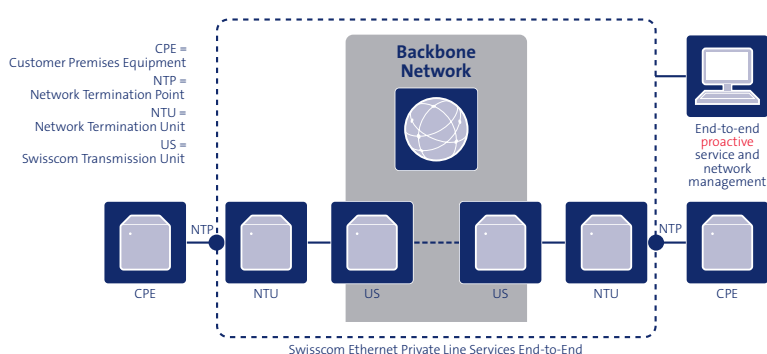

- The transmission bit rate is guaranteed and transparent
- You can use the service throughout Switzerland
- Real-time service
- All layer-2-specific protocols are available end to end
- A single broadcast domain
- Your telecommunications costs can be clearly budgeted.
- Guaranteed return on investment thanks to scalability and future-oriented technology
- High reliability

What you need

As a company with two or more sites, you are seeking the best possible value for money. Communication therefore has great strategic importance for your business development. Speech, data and images can be transmitted securely. Flexibility with regard to choice of bandwidth and site expansion can help you meet the increasing requirements placed by the various applications in your company.

Our solution

Swisscom Ethernet Private Line Services provide an end-to-end solution for a communications network with guaranteed bandwidth. Thanks to transparent, protocol-independent data transmission, Swisscom Ethernet Private Line Services can be used for data and voice applications.
