Charging cradle

Installation overview

1 Your router must be installed and switched on.

2 Insert the batteries and close the compartment.

3 Select your language.

English

OK

4 Take your phone and go to the place your router is installed.

i Connect to router

**7** More information for Swisscom customers at www.swisscom.ch/hdphones-help

You have now set up your Gigaset E560HX.

6 Connect the adapter to the power socket of your choice.

When you first set it up, we recommend fully charging the telephone until the display icon ⚡ is no longer visible.

5 Press the connection button on your router.

Wait for the phone to connect.
If the connection hasn't worked, repeat steps 4–5.
You can see the registration mode of the phone in the menu under
> Settings > Registration > Register Handset > OK
