## Offline firmware/dashboard update of Huawei hotspots for models

Caution: please note that a local firmware update for the hotspot always requires that the laptop be connected with a USB cable.

First check whether the hotspot can be updated online. (via WebGUI (http://192.168.8.1) on the 'Update' tab)

## Instructions for firmware/dashboard update in Windows

- 1. Connect the hotspot via the USB cable supplied with your Windows laptop.
- 2. Double-click on the file for the appropriate laptop model to launch the update wizard:

Model	Firmware	Dashboard
E5776s-32	E5776_Update_22.265.09.07.103.exe	Update_UTPS1.12.00.103_MAC1.12.00.103.exe
E5786s-32a	E5786_Update_21.299.01.06.103.exe	Update_WEBUI_17.100.07.02.103.exe
E5786Bs-32a	E5786_Update_21.313.17.03.103.exe	Update_WEBUI_17.100.14.01.103_NE5.exe

Click the 'Start' button to begin updating the firmware.
(While the screenshots show the model E5786s, the update process is the same for all models)
