

ZERO OUTAGE APPROVED

At Deutsche Telekom Technik GmbH, we place the highest priority on the quality of services rendered to our customers. Through a Zero Outage culture, any possible source of problems are systematically analyzed and addressed, thereby significantly enhancing quality and customer satisfaction.

We confirm that

SWISSCOM

has successfully participated in and passed
the Zero Outage Approval Program.

By passing this certification program you have committed to the Zero Outage Program, successfully participated in Zero Outage “fire-drills” and signed a Working Level Agreement (WLA).

This certificate is valid for Calendar Year:

01-Jan-2023

31-Dec-2023

Continuous success with regard to Zero Outage relies on working together to ensure that any critical and major incidents are handled in the same professional way that was demonstrated in the program to-date. Critical incidents must be handled by the incident management process agreed in the WLA combined with appropriate problem management follow-up.

We look forward to your support in making this joint Zero Outage Program a success.

Sincerely,

Rainer Offermann

Head SuperSquad Production
