Notes:

The offer is only available with a DSL and NATEL® Pro subscription; it is a customised combination of a NATEL® subscription and DSL. It applies to the NATEL® subscriptions: entry, basic, entry plus and infinity. The NATEL® infinity plus subscriptions are excluded. The minimum contract term for the supplementary DSL contract is 12 months. Please note that your fixed network connection will be muted. You will therefore no longer be able to make any telephone calls (including emergency calls) using the fixed network connection. For technical reasons, no static IP addresses may be used. DSL and NATEL® Pro can also be combined with Swisscom TV start and basic.

The subscription is automatically transferred to one of the subscriptions that apply to residential customers either after a year or when you reach the 26 age limit. The existing minimum subscription or extension term is transferred at the same time.

DSL and NATEL® Pro is not possible on fibre optics.
