If you click on a provider's icon your browser directly connects to the provider's servers. The content of the plugin is transmitted by the respective provider directly to your browser and integrated into the provider's social media platform. The incorporation of the plugin enables certain information to be transmitted to the provider and stored by it.

Even if you are not a member of the social networks concerned, it is still possible that these networks may learn and store your IP address through the social plugin. If you are logged into one of the social networks, the provider may directly allocate your visit to the Teleclub websites to your personal profile on the social network.
