

Paymit as a Service

The mobile payment solution of the future.

Financial institutions use mobile payment solutions in order to help them retain their existing customers and attract new ones. For many banks, mobile payment is at the top of the strategic digitisation roadmap.

With Paymit as a Service, you can be a part of Switzerland's mobile payment solution which, thanks to its user-friendly design, creates valuable customer experiences and is therefore establishing itself as the long-term mobile payment solution of the future.

What is Paymit as a Service?

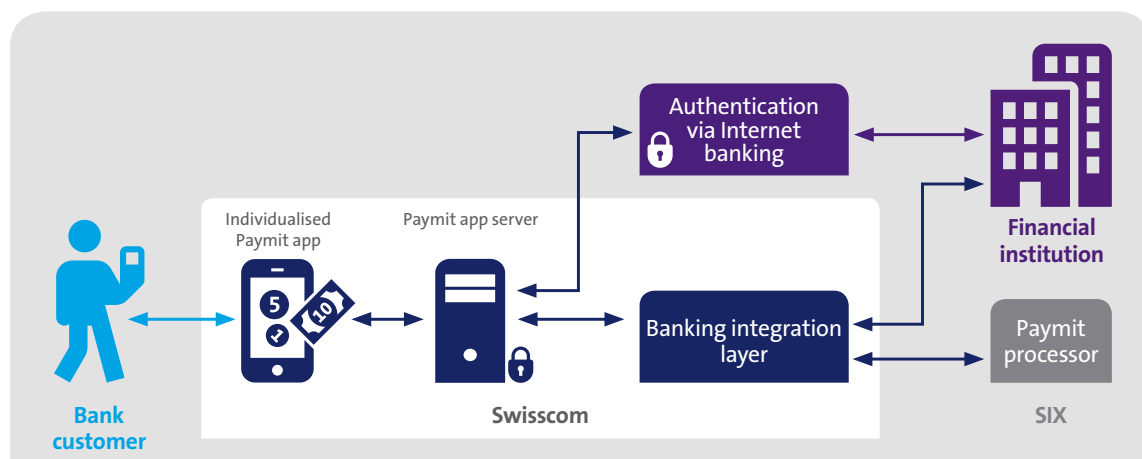

Paymit as a Service is a mobile payment solution that enables your customers to benefit from the advantages of mobile payment via an individualised Paymit app. The app, hosted by Swisscom, is directly connected to your bank's processing system, so the money leaves the customer's bank account immediately. A complex security solution ensures that the app meets high security standards. The service is constantly being developed further in cooperation with SIX and the participating banks.

How you benefit

With Paymit as a Service

- > the mobile payment process is simpler because the money leaves your customer's bank account immediately; the additional effort for the customer is much smaller and therefore improves your relationship with your customers in the long term
- > you benefit from the close collaboration between Swisscom and SIX
- > Swisscom, as the leading IT partner of the Swiss financial services industry, guarantees quick, efficient implementation and constant further development of the service
- > you are spared the expensive, time-consuming job of developing your own payment app

The mobile payment solution directly connected to your bank.

Facts & Figures

Paymit as a Service – in detail

Basic services	> Creation of a bank-specific Paymit app (name, colours, specific text)
	> Connection to bank's own e-banking security solution (Airlock IAM, U-Safe, CLX Login)
	> Connection to bank's processing system for direct debit from bank account (Avaloq or Finnova)
	> Individual activation of connection to SIX (participation in the SIX Paymit scheme must be guaranteed by the bank)
	> Operation and maintenance of the Paymit app and of the relevant connections to the bank
	> Further development of the Paymit app in consultation with SIX and the participating banks
Optional services	> Connection of the bank to Paymit as a Service via Card-one/Card-x (Swisscom card solutions)
	> Guaranteed connection between data centres if the banking system is not hosted in a Swisscom data centre
Additional services	> Connection of non-standard e-banking security solutions (see basic services)
	> Connection of other banking systems
	> Automated Paymit registration of non-e-banking customers
	> Other product launch services (e.g. support with campaigns, making the app available in the App store, etc.)
