

**Semtech** - [www.semtech.com](http://www.semtech.com)

### **About us**

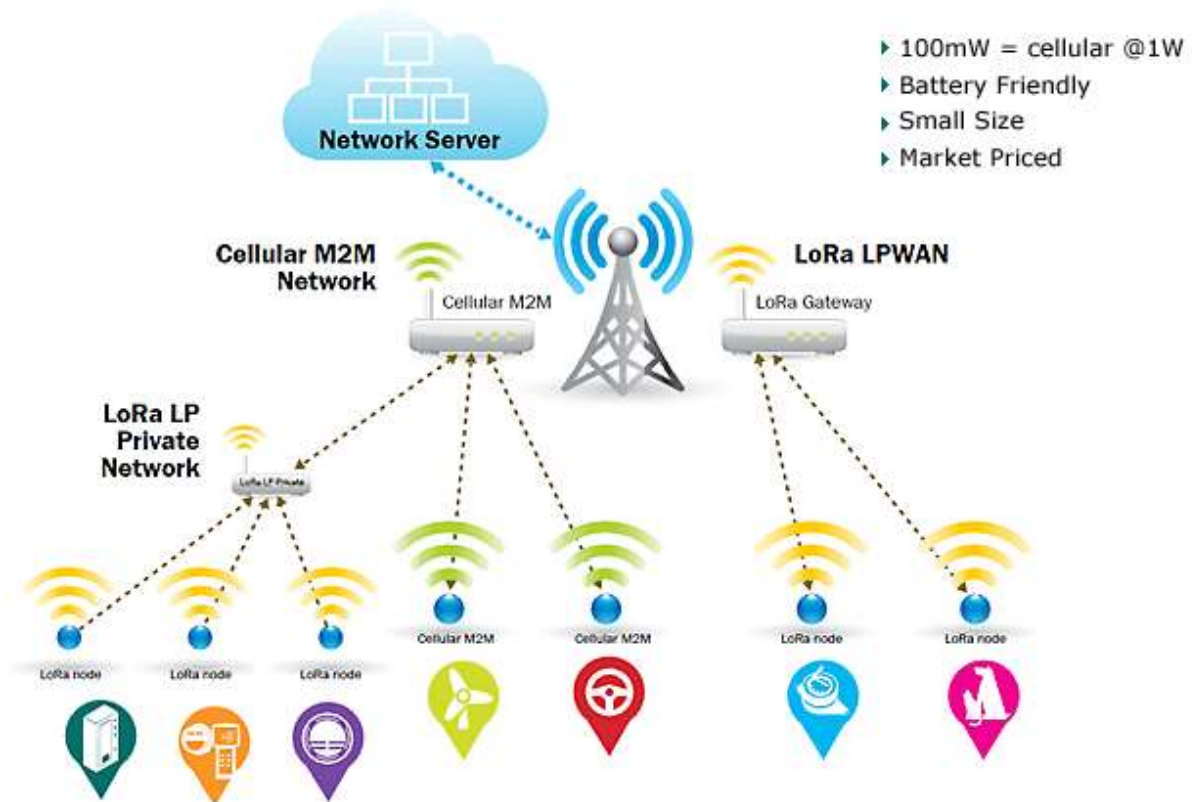

Semtech Corporation is a leading supplier of analog and mixed-signal semiconductors for high-end consumer, enterprise computing, communications and industrial equipment. Products are designed to benefit the engineering community as well as the global community. The company is dedicated to reducing the impact it, and its products, have on the environment. Internal green programs seek to reduce waste through material and manufacturing control, use of green technology and designing for resource reduction. Publicly traded since 1967, Semtech is listed on the NASDAQ Global Select Market under the symbol SMTC

### **What we do**

Out of the 50 billion predicted nodes to be connected to the Internet by 2020 fewer than 10% are predicted to use cellular technology. Telecommunications companies will need long range, high capacity systems to consolidate the fragmented battery operated wireless market for sensor networks, smart cities, smart metering, security systems, smart home, and industrial control. With our LoRa™ RF platform, we have developed a 2-way wireless solution that complements M2M cellular or WiFi infrastructure, and provides a low-cost way to connect battery operated and mobile devices to either the network infrastructure or end point.

### **Our Products/Services on LPN**

LoRa™ connects to the Cloud Objects over 20 Km range with very low power and highly efficient Spectrum Occupancy on World Wide subGHz bands.
