The ideal addition to NATEL® go,
Push to Talk offers a reliable solution
where business-critical communication is a must.
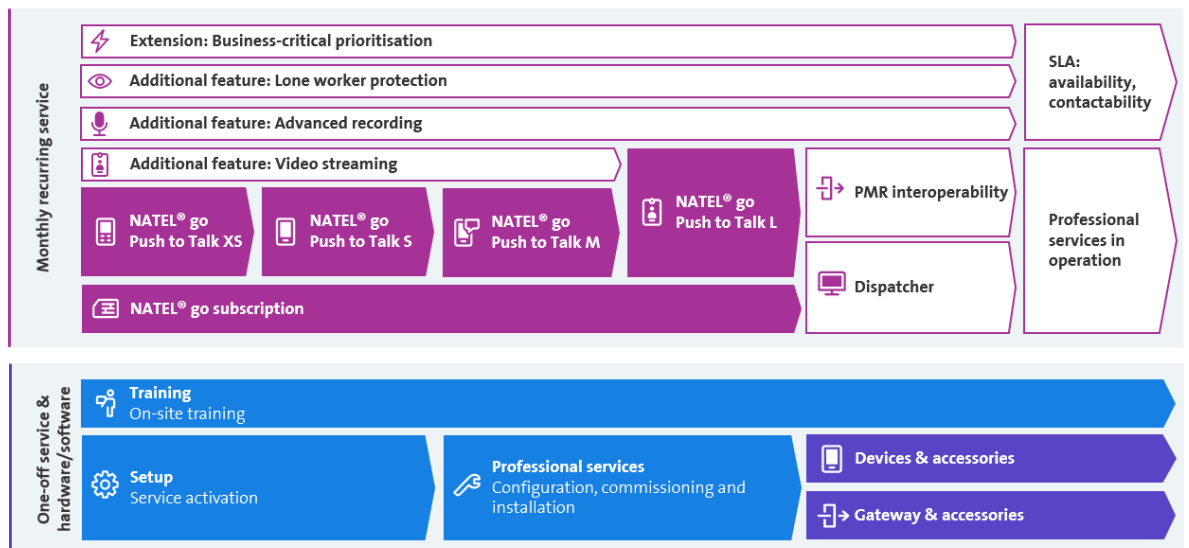

Guaranteed communication throughout Switzerland thanks to Push to Talk – communicate anytime on any network thanks to our business-critical service.

What is Push to Talk?

Push to Talk is an additional feature available as an option with NATEL® go subscriptions from Swisscom. It guarantees seamless communication in areas that are business-critical. This means communication is possible even if the mobile network is overloaded. The application can be used on smartphones, selected robust Push to Talk radios or even via a dispatcher function.

Your benefits with Push to Talk

− Guaranteed communication in emergency situations thanks to business-critical functions

− Independent group communication throughout Switzerland, regardless of network, device and location

− One-stop shop
Swisscom provides advice, planning, configuration, set-up and operation from A to Z

− Modular expansion
Options, devices and applications can be flexibly expanded

− A step towards digitalisation
Thanks to the modular structure, functions such as video streaming, app connections, etc. can be implemented
