

## **Swisscom TV: the best entertainment anywhere and at any time**

**With the new Swisscom TV app, customers will be able to personalise their viewing even more. The free app now offers access to over 80 channels and more than 3,000 sporting events a year in Switzerland and abroad, including live sporting events. Customers can now also watch time-delayed programmes on their tablets and smartphones, as well as on their home TVs.**

For most Swiss people, a relaxing evening in front of the television will continue to mean watching it at home on the sofa. However, for some years now, accessing TV and music content from tablets and smartphones has become more and more common, not only as a TV substitute while on the move, but increasingly as a second TV at home.

With the new Swisscom TV app, tablet and smartphone users will now be able to enjoy TV content on all their devices, anywhere and at any time. The Swisscom TV app brings together the former “TV Guide” and “TV Air” apps and comes with a host of new functions.

### **A comprehensive range of entertainment options and individual usage options**

The Swisscom TV app now allows you to watch more than 80 channels and live sporting events. Programmes can be recorded while on the move and accessed later on a TV, PC, tablet or smartphone, regardless of which device the programme was recorded on. The live pause and replay functions for time-delayed television are now additionally available on mobile devices.

The free Swisscom TV app is available now for iPhones and iPads and for all brands of Android smartphones. The Swisscom TV air app for Windows Phone will continue to be available. A Swisscom TV air subscription is required to use the replay and live pause functions. This is included in the Vivo Casa combined packages or is available for CHF 9 per month.
