Service Fulfillment

Postponement of the replacement of the FTTH Coverage Lists

Replacement of the FTTH coverage lists in the WSG Information

Background:

With the revision of the AKFT, the data management of the planned and orderable fiber locations was standardized. To this end, new lists with the prefix 55 will be displayed to the ISPs instead of the lists with the prefix 35:

- Prefix 55: ISP und CoPa

The digits "999999_" preceding the names of the 35 lists are no longer displayed in the 55 lists.

During a three-month transition period, both lists will be displayed in parallel.

Procedure:

- Activation of 55 lists are now available on WSG
- Ongoing public testing of the new WSG lists (Launch in Q2 2025)
- Removal of the 35 lists in Q2 2025

Do not hesitate to contact us at bbcs.service@swisscom.com if you have any questions.

Service Fulfillment

Change in Process of Copper Interim Use

In case of ordering a BBCS connection on a Central Office which can no longer be operated by Swisscom due to the termination of the lease, it is no longer necessary to enter a disconnection date.

- WSG will no longer automatically create the DISCONNECT order when the CREATE order is entered.
All ISPs are requested to submit the DISCONNECT order at least 30 days before the end date of service availability.
- If no DISCONNECT order is entered by the ISP, WSG generates a DISCONNECT order 30 days before the Service Availability End Date is reached.
This order generated by WSG cannot be modified by the ISP.
- For addresses that have reached the "End of Service Date", the unavailability of copper will be displayed in the "Service Availability Qualification" (SAQ).
As soon as the "End of Service Date" is reached, the SAQ returns the following error message:
 - QIX „A copper connection is no longer possible at this location.“

Responses

Qualif Result Detail

Result Code: QIX

Result Comment: A copper connection is no longer possible at this location.

Service Fulfillment

Change in Process of Copper Interim Use

The orders affected by "Copper Interim Use" can be viewed by the ISP in the "WSG Information Service" (GUI + B2B). Shifts of "EndOfServiceDate" are visible as well.

The list can also be downloaded from the GUI. It is available in "WSG Information Services".

Summary:

Pre-Info: Optimization of Migration Project Reason ID

As part of the optimization of the Migration Project Reason IDs, minor changes will be implemented that may impact your experience as an ISP. These updates are aimed in enhancing efficiency and streamlining processes.

- **What's Changing:**
Minor adjustments related to the optimization of Migration Project Reason IDs.
- **Timeline:**
The changes will take effect as part of the March Release 2025.
- **Next Steps:**
Detailed information regarding these updates will be provided in the upcoming monthly Release Information communication.

WSG

Pre-Info: "Instant Migration"

As we announced in autumn 2024, we have now started the first preparatory work in IT for Instant Migration.

As a result, you will see more information on Instant Migration in the upcoming releases. The release of the entire function is still scheduled for October 2025.

Change of the FTTH Rollout Information

As announced in the Wholesale Construction News in January, we are changing the FTTH rollout information (55 lists) as of 1 April.

To achieve these improvements, we are implementing the following changes:

- The target time frame for achieving quality class GK 2 (with a target range of ISR data accuracy of +/- 30 days) will be shifted from the end of the design phase to the start of construction.
- For quality class GK 1 (with a target range of +/- 7 days), we are now aiming for a very high short-term reliability of 98%.
- Quality classes GK 3 and 4 refer to the planned project end date of the FTTH rollout, providing support for your long-term planning.

At the same time, the new glossary for the lists in the WSG is now available for download.

Please note: As announced in the January Release Information the "35 lists" will be removed from the WSG Information Service / FTTH Coverage.

Service Assurance

Reconfigure Virtual Port

The existing "Fiber Info" functionality has been enhanced for XGS-PON / DHCP with a new "Reconfigure" button (GUI) or a new "reconfigure" operation (B2B REST only).

If the user clicks on the new button or uses the new operation via B2B, WSG performs a "Virtual Port Reset".

B2B:

- Schema: ngwsg-asr-b2b-v1.2.json V1.2 (REST)
- Ressource (neu):
 - `/rest/v1/subscriber-line/xgs-pon/reconfigure`

GET /rest/v1/subscriber-line/xgs-pon/reconfigure	
Re-configures a XGS-PON subscriber line	
Parameters	
Name	Description
otold * required string (query)	otold
plugNr * required integer(\$int32) (query)	plugNr

Optimization of Migration Project Reason ID

As announced with the January release, the Reason IDs in the migration project are optimized as follows:

The following Reason ID is added due to optimizations in the migration project:

- Reason ID 55 - Fiber Card/Port Change
The migration will typically be performed during office hours on a specific date. Each BBCS connection will experience a maximum interruption of 120 minutes.

The following Reason IDs are deleted due to adjustments from the migration project:

- Reason ID 31 - Stromunterbruch
- Reason ID 53 - UMSA – Tool
- Reason ID 66 - FTTS/B UMSA mit Leitungsverkuerzung
- Reason ID 68 - FTTS/FTTB_activation
- Reason ID 81 - POC
- Reason ID 88 - NG-FAN

Copper Migration Potential

To make it easier for you to identify your BBCS copper connections - at whose address fibre is already available - a corresponding function will be available from the August release under the new tab "Copper Migration Potential".

From the beginning of September, your BBCS copper connections with fibre potential will be available for download there as CSV lists.

These lists will be available both in the GUI and on B2B.

Additional User comment

A new schema version is available to include the comment from the agent in the B2B response of the getOrderDetail operation.

The field is available in all order types in the current order as well as in the history.

B2B FUF schema for BBCS-Copper and BBCS-Fiber

Change of the FTTH Rollout Information

Preliminary Information

In the course of the introduction of "Instant Migration (IM)", we are changing the FTTH rollout information ("55-lists") as of 1 November.

FttxCoverage	COMPLETED	created	20251010_55_FTTH_Ready_For_Marketing_Information.csv.gz
FttxCoverage	COMPLETED	created	20251009_55_FTTH_Ready_For_Order_Information.csv.gz

The following columns are also displayed in FTTx Coverage:

- Sad_Inst_Mig_Ind [Y/N]:
Indicates that IM is planned at this location
- Sad_Inst_Mig_Order_End_Dt [Date]:
Indicates the date up to which IM orders can be placed. IM Order Start Date is ISR which is already displayed in the list
- Sad_Inst_Mig_Inst_End_Dt [Date]:
Shows the date until which IM will be performed at this location

At the same time, the new glossary for the lists in the WSG is available for download.

Change of the FTTH Rollout Information

Information update

As part of the introduction of 'Instant Migration (IM)', we updated the FTTH rollout information ('55 lists') at the beginning of November. At the same time, the new glossary for the lists in the WSG was available for download.

FttxCoverage	COMPLETED	created	20251010_55_FTTH_Ready_For_Marketing_Information.csv.gz
FttxCoverage	COMPLETED	created	20251009_55_FTTH_Ready_For_Order_Information.csv.gz

As soon as the information becomes available, the following fields are filled in:

- Sad_Inst_Mig_Ind [Y/N]:
Indicates that IM is planned at this location
- Sad_Inst_Mig_Order_End_Dt [Date]:
Indicates the date up to which IM orders can be placed. IM Order Start Date is ISR which is already displayed in the list
- Sad_Inst_Mig_Inst_End_Dt [Date]:
Shows the date until which IM will be performed at this location

Service Assurance

IP-Pool 2 enabling

As with copper, "IP Pool 2" can now also be set as the default value for fiber.

ISP Order Service Settings
