Service Fulfillment Qualification enhanced by EGAID

WSG additionally supports the address qualification by means of the EGAID (Eidgenössischer Gebäudeadressidentifikator):

Fibre/Copper SAQ Request as well as Copper SQ Request have been extended with the EGAID.

EGAID - Eidgenössischer Gebäudeadressidentifikator

This is a unique identification number for the whole of Switzerland and for each building address. It is assigned by the Federal Office of Topography.

The Federal Register of Buildings and Dwellings contains all buildings with residential use and their dwellings in Switzerland. The most important basic data such as address, location coordinates, year of construction, number of stories, type of heating system for the buildings are recorded. Information on building projects is also included in the register.

Service Fulfillment Qualification enhanced by EGAID

The data can be obtained from the [Bundesamt für Statistik](#) under [Bereitstellung von Daten MADD](#).

Eidg. Gebäude- und Wohnungsregister

Organisation und Nutzung

Das Bundesamt für Statistik führt das eidg. Gebäude- und Wohnungsregister (GWR) in Zusammenarbeit mit Bauämtern sowie weiteren Fachstellen von Bund, Kantonen und Gemeinden. Das GWR enthält die wichtigsten Grunddaten zu Gebäude und Wohnungen und seine Nachführung erfolgt laufend.

Weitere Informationen zum GWR finden Sie auf dem [Statistikportal der Schweiz](#).

Das GWR wird für Statistik-, Forschungs- und Planungszwecken genutzt und dient den Kantonen und Gemeinden für den Vollzug von gesetzlichen Aufgaben.

[Weitere Informationen](#)

Gebäudeadressen und Darstellung auf dem Bundesgeoportal

! Das Geoportal des Bundes stellt Informationen über Gebäudeadressen gemäss Merkmalskatalog 4.1 zur Verfügung und ermöglicht das Einsehen von öffentlich zugänglichen Informationen durch Klicken auf "Zusatzinformation" im Feld "Objekt-Information".

Service Fulfillment Additional information

A known disconnect date will be visible on the BBCS-F Order in the Response Comment field.

Service Assurance Fiber Info

As announced, Fiber Info has been decoupled from xDSL Info and is now displayed in a separate area.

The screenshot shows a web application interface for 'Fiber Info'. On the left is a vertical navigation menu with the following items: 'Access TT', 'xDSL Info', 'Fiber Info' (highlighted in yellow), 'Rogue Alarm', 'Connectivity TT', 'Connectivity Check', and 'UMSA/Planned Work'. The main content area is titled 'Fiber Info' and contains a 'by' label followed by three radio button options: 'NSN' (selected), 'OTO', and 'OTO Partner'. Below these options is a text input field containing 'NSN'. At the bottom of the main area, there are three buttons labeled 'Back', 'Check', and 'Print'.

Service Assurance

Enhanced infrastructure information

The ISP is given the option to query an unused DBC for the location of a PreOrder (GUI + B2B).

This function is only available on existing PreOrders.

The screenshot shows the BBCS Access web application interface. At the top, there is a navigation bar with several tabs: Response Log, Transaction Overview, Qualification History, Preorder/Activation Ticket, **Get unused DBC on UP** (highlighted with a red box), and Processing Analysis. Below this, there is a secondary navigation bar with buttons for Back, Modification, Reschedule, Cancel, Reset, Resume, Correct, Resolve Clean Order, Release Preorder, State Change, Disconnect DBC Log, and Operate.

The main content area is titled 'Unused DBC on UP' and displays the following information:

ISP	777710 - Testaccount WSG Team
Order Nr	77771020201012000025000000
NSN	-
Binding Id	-
Dn Office	648OL

Below this information, there is a section titled 'Cable Box' with a table of details:

Board Nr	101
Switching Place Nr	1
Contact Type	3
Contact Nr	102
Contact Nr 2	103
Contact Nr 3	104
Contact Nr 4	105
Coordinate X	50
Coordinate Y	40

A 'Back' button is located at the bottom of the page.

Service Assurance

Enhanced Mass Outage information

The existing "Mass Outage" functionality is extended with the Root Cause field.

The following root causes are displayed:

Mass Outage and Rogue Alarms
