BBCS Release Information, C1 Public

Service Fulfillment

Clean-up Order Information

If WSG periodically checks the switch-off date of the predecessor, a new entry is only created in the order history if there is a change.

Use Cases:

- BBCS_CREATE on active FBC and Jumper Action Y (Tech Change)
- Product change BBCS-F <-> ALO

WSG Information Services
GUI and B2B Schema Adaptation

Changes in GUI

Adaptation: the operations UMSA/Planned Work is removed.
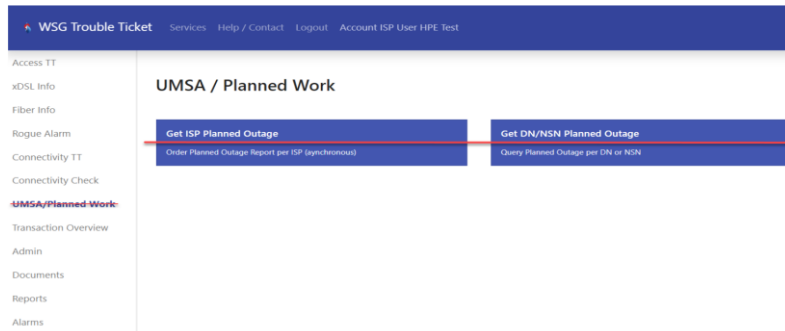

Remark: Planned Outages have been integrated into the Migration Project since January Release 2023.
WSG Information Services
GUI and B2B Schema Adaptation

Changes in the B2B schema

Schema: wsgTtOutbound.wsdl V47

Adaptation: the operations getDnNsnPlannedOutage, getIspPlarnedOutage and getIspPlannedOutageReport are removed.

Remark: The operation "downloadFile" in WsgInfoSrvOutbound is available for downloading the Network Customer Notification Report.

WSG

Cloud-based Radius Server

As previously announced, Swisscom is introducing new cloud-based Radius servers.

This means that the new IP addresses must be updated in your systems. The following addresses are planned to be added soon:

Host (FQDN)	IP-Address
vip-spt-rad-zh1	138.188.192.115/32
vip-spt-rad-zh2	138.188.192.108/32
vip-spt-rad-ol1	138.188.192.196/32
vip-spt-rad-ol2	138.188.192.114/32

Please add these changes to your system and be prepared when we start to use it.

Please use the same radius secret (in client files) as you already use on the current implementation.

For decommissioning of the existing Radius Server addresses we will inform you in a later release info.

WSG
Pre-Information Change of Interface

As part of the modernisation of WSG B2B, we are changing the B2B protocol from SOAP to a modern B2B REST architecture in the medium term.

In preparation for this step, we will start to publish the existing B2B REST documentation in the coming releases.

We will communicate about the definitive replacement at an early stage.
