## Service Fulfillment

### Copper Interim Use

As announced, Swisscom's copper network will be replaced by the modern fibre-optic network, which will inevitably lead to a clean-up of the central offices (CO).

If a CO can no longer be operated by Swisscom due to the termination of the lease, the copper connections located there must be removed at a certain point in time (service availability end date).

The ordering of further copper connections at these locations is still possible with restrictions. If a copper connection is ordered at such a CO, it can only be operated until the Service Availability End Date.

# Service Fulfillment

## Copper Interim Use

The following new features have been introduced:  
WSG Information Service / Copper Phaseout

Home  
Reports  
Standard Reports  
Data Exchange  
Information Request  
Migration & Outage  
Infrachecker  
CoPo Zone Contract  
FTTx Coverage  
Copper Migration Potential  
Clarification Ticket  
Address Validation  
**Copper Phaseout**  
Admin  
Documents

In both areas, the "Number of entries" display has been supplemented by the total number of data records and a download function for all data records ("Download all").
