Product Change BBCS-F to ALO

When triggering a disconnect on a BBCS-F access, WSG checks whether a Create ALO or a Product Change order is pendent on the requested access.

If an order is present and the disconnect is on a later switch-out date, the disconnect order is rejected with a corresponding error message, specifying the activation date of the Create/Product Change.

The screenshot shows the BBCS Access web interface. At the top, there is a navigation bar with the following items: **BBCS Access**, [Services](#), [Help / Contact](#), [Logout](#), and [BB FUL SystemSuperUser](#). On the left side, there is a sidebar menu with the following items: **Place Order**, [Maintain Order](#), [Voice Messages](#), [Installation Ticket](#), [Change Ticket](#), and [Transaction Overview](#). The main content area displays an error message in a yellow box: "Error: PD9 - For this Socket/Plug a pending CREATE ALO ProductChange order exists with activation date = 14.06.2020". Below the error message, there is a section titled "Basis Disconnection" with a form containing the following fields: "ISP" with a dropdown menu showing "777710 - Testaccount WSG Team", and "Basis Contract Element" with the value "BBCS_F (Fiber)".

Service Assurance

Contact Person mandatory

As with trouble tickets for BBCS-F and ALO, „First Name“ und „Last Name“ in “Contact Person” become mandatory for copper services as well.

Error: C17 - A last name is required with a first name. Error creating access troubleticket! (Ask Swisscom)

Service Assurance Preinfo

The query option in xDSL INFO and Connectivity Check is extended by searching with MAC address.

This feature is only partially implemented with the June release and therefor not usable.

Not visible in the GUI. B2B listed but not supported.

Regarding the next implementation steps, we will inform you in future release info.
